

**MOTOR CITY'S HIGHEST-QUALITY
PRECISION MACHINING EXPERTS**

**CAPABILITY
STATEMENT**

Since 1951, Schwartz Machine Co. is proud to be a full-service machining shop specializing in prototype and short run production machining services. We adhere to the customer's precise prototype machining needs for powertrain, body, chassis and more. We ensure the "art to part" is exemplary and the final product exhibits our brilliant finish, excellence, and "WOW" factor. Our technical prowess has evolved through a unique history of first-hand experience with complex requirements, where quality is always the #1 priority. All work is performed with dedication and attention to detail to ensure the product is "right the first time" at a fair price.

INDUSTRIES SERVED

- Automotive & Transportation
- Racing & High Performance Applications
- Aerospace & Defense
- Heavy Equipment & Machinery
- Ship Building & Maritime

CORE COMPETENCIES

Strategically positioned in Warren, Michigan, Schwartz Machine encompasses 44,000 sq. ft. of premium manufacturing space where we specialize in CAD Part Design, CNC Programming & Machining, Fixture Design & Manufacturing, Vacuum Resin Impregnation, Leak Testing, Honing, High-Pressure Wash, and CMM Inspection. With over 40 Precision NC Machine Tools, we offer prototype and semi-production operations for high-alloy metal, castings, plastic, synthetics, and composite materials that include boring, drilling, milling, tapping, turning, threading, and more. Proudly, we precision machine parts and tooling of all sizes.

PRODUCT SPECIALTIES

- Engine Components
- Drive Train
- Suspension Systems
- Braking Components
- Automotive Body Structures
- EV Propulsion Systems
